PROFESSIONAL SUMMARY

Software engineering and data science student at UC Berkeley with proven experience delivering production-quality tools at Lockheed Martin and SRI, including Python automation systems, AI-assisted grammar tooling, and requirements visualizations. Skilled in Python, Java, and SQL; effective at translating technical work to cross-functional stakeholders.

EDUCATION

University of California, Berkeley

B.A., Data Science.

Expected May 2028

San José State University

B.S., Computer Science. President's Scholar. GPA: 3.93.

Transferred June 2026

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Design

EXPERIENCE

Software Project Intern, Knowledge Team Lead

Feb 2026 – June 2026

Stanford Research Institute (SRI)

- Collaborated internationally with a team of 10 from SJSU, SRI, and Technische Hochschule Ingolstadt
- Developed a grammar formalizer enabling domain experts to work with AI models via OpenAI tokens
- Designed a Human-in-the-Loop validator to ensure grammar change outputs matched desired outcomes
- Containerized and version-controlled project components using Docker and GitLab

Systems Engineering Intern and Co-op

May 2025 – Aug 2026

Lockheed Martin

- Developed scripts to reduce metrics processing time by 90%, saving hours of work for Systems Engineers
- Built Python automation tools to reduce manual processing time and improve workflow efficiency
- Developed visualizations to model requirements data using Python and Pandas
- Presented findings and live demos to engineering teams across SRR, PDR, and CDR lifecycle reviews
- Researched project management processes and presented findings to 15+ stakeholders, including Chief Engineer
- Assisted Systems Engineer spec authors in crafting multi-functional requirements in DOORS Next Gen

Software Intern

Aug 2024 – June 2025

SJSU FSAE Spartan Racing

- Developed embedded C software for an electric vehicle braking system derating function
- Executed testing cycles to validate safety and performance requirements

Instructional Student Assistant

Aug 2025 – May 2026

San José State University, Physics Department

- Selected to grade assignments for Physics 50 based on strong academic performance

PROJECTS

FinishInFour

Feb 2026 – May 2026

Team Project Lead

- Led development of a database-driven course planning tool in Java, JavaScript, CSS, HTML, and JSP
- Translated academic policies into structured data models and logical workflows

ACTIVITIES & LEADERSHIP

Society of Women Engineers

Aug 2024 - May 2026

Professional Development Committee Chair

- Organized "LeetCode Lock-In," a technical interview prep event with 30+ attendees; selected by SWE National Organization for the Collegiate Leadership Institute (CLI)

Girls Who Code

Aug 2024 - May 2026

Treasurer

- Managed a \$10,000+ budget, oversaw funding allocations, and processed all invoices, dues, and reimbursements

San José State University

Jul 2025 - May 2026

Resident Advisor

- Coordinated programs for 60+ residents and served 24-hour duty shifts responding to emergencies

SKILLS

Technical: Python, Java, JavaScript, MySQL, REST APIs, HTML, CSS, Git, GitLab, Docker, Pandas, Tableau, Figma, Confluence

Language: English (fluent), French (bilingual)
