EDUCATION

University of California, Berkeley
B.A., Data Science *Expected May 2028*

San José State University
B.S., Computer Science, President's Scholar. GPA: 3.93 *Transferred June 2026*
Relevant Coursework: Data Structures and Algorithms, Intro to AI, Intro to Data Visualization

TECHNICAL WORK AND PROJECT EXPERIENCE

AI Student Researcher **Sept 2026 - Present**
United States Space Force
• Investigating how much autonomy AI agents can exercise in scientific inquiry as part of a team building a shared agent harness
• Running experiments on ReplicationBench (expert-validated astrophysics research tasks) to compare levels of human oversight and test whether agents revise claims and next steps in response to evidence
• Working toward a research paper and reproducible codebase by end of semester

NASA Carruthers Mission URAP | Research Intern **Sept 2026 - Present**
UC Berkeley Space Sciences Laboratory
• Working under NASA Carruthers Mission Project Scientist to process and analyze images from satellite

Systems Engineering Intern and Co-op **May 2025 - Aug 2026**
Lockheed Martin
• Developed scripts to reduce metrics processing time by 90%, saving hours of work for Systems Engineers
• Built Python automation tools to reduce manual processing time and improve workflow efficiency
• Developed visualizations to model requirements data using Python and Pandas
• Assisted Systems Engineer spec authors in crafting multi-functional requirements in DOORS Next Gen

AI Software Project Intern **Feb 2026 - June 2026**
Stanford Research Institute (SRI)
• Collaborated internationally with a team of 10 from SJSU, SRI, and Technische Hochschule Ingolstadt
• Developed a grammar formalizer enabling domain experts to work with AI models via OpenAI tokens
• Designed a Human-in-the-Loop validator to ensure grammar change outputs matched desired outcomes
• Containerized and version-controlled project components using Docker and GitLab

Instructional Student Assistant **Aug 2025 - May 2026**
San José State University, Physics Department
▪ Grade student assignments for Physics 50 - Mechanics, selected for the role due to strong academic performance
▪ Assisted professor with exam administration, grading, and digitizing course for 21st century

LEADERSHIP AND ACTIVITIES

Society of Women Engineers **Aug 2024 – Present**
Professional Development Committee Chair at SJSU + Professional Development Month Chair at UC Berkeley
• Created "LeetCode Lock-In," a technical interview prep event with 30+ attendees; selected by SWE National Organization for the Collegiate Leadership Institute (CLI)

Resident Advisor **Jul 2025 - May 2026**
▪ Coordinated community programs for 60+ residents, fostering engagement and inclusion within the residence hall
▪ Served multiple 24 hr duty shifts handling nighttime calls involving emergencies, resident assistance, or lockouts

SKILLS

Technical - Java, Python, MySQL, Git, REST APIs, Figma, Confluence, Tableau, JavaScript, HTML, CSS
Language - French and English Biliteracy
Interpersonal - 1 of 40 to receive “Rising Spartan Award” for care and commitment to Resident Advisor role
